

## **Window Glossary**

All the windows that we make are vinyl and custom made to your size. We carry a wide array of window styles that can work with any project. Each window line offers different features that will work with your home. We have a wide variety of colors inside and out.

Remember when you order windows it is always width first and height second. Also any hinge side is from the inside looking out.

**Double Hung:** Is a window that both sashes tilt in for easy maintenance. The sashes also move up and down. This window can come in a twin unit. It can also come in a 3 section unit with a picture window in the middle and 2 double hungs can be on each end. This window also comes with a half screen.

**Slider window:** Moves side to side in the mainframe. This window can also be made into a three section unit by having a picture window in the middle. This window comes with a half screen

**Single hung:** Is a window where the top sash does not move. Only the bottom sash moves up. This window does come with a half screen and a nailing flange. The depth of the window is less than a replacement window.

**Picture Window:** This window does not have any movement at all. It's sole purpose is to just be able to look at your view with no obstruction.

**Casement window:** Is a window that cranks out. It is one piece that usually cranks out to a 90 degree angle. This window can also have 2, 3, 4, up to 5 lights all together in 1 master frame. This window comes with a full screen that is also located on the inside of the window, rather than the outside.

**Glass Block** (also needs to be added to the list and a photo is needed) Glass block is made up of solid glass blocks that are bonded by cement. They can have vents in them for ventilation as well as a dryer vent for access. Blocks come in three different patterns, clear, diamond and wavy. They are also ordered on the even inch and are very cost effective.

**Historical Windows:** Are any type of window that will maintain the original characteristics of the home.

**Bay and Bow Windows:** Both are built in a frame that also has a projection from the home and are made up from either double hungs, casements, and picture windows. A bay window is only made up of 3 windows with the middle window usually being larger and flat across the front with 2 smaller windows anchored from the side.

**A Bow Window:** Has a round shape to the frame and it can be composed of a 3, 4, 5, windows.

**Commercial Windows:** Are aluminum windows. They can be composed of all the same types of the vinyl replacement series.

**Patio Doors:** We sell a wide variety of patio doors. Standard sizes and custom sizes, 2 sections & 3 sections with blinds and without blinds.
